EDUCATION

Sichuan University

B.Eng. in Computer Science

Chengdu, China

Sep. 2025 – Expected Jun. 2030

– Required-course GPA: **4.0/4.0**; Average: **94.7/100**; Rank: **2/288**.

RESEARCH INTERESTS

LLM Agents; Agent Planning and Memory; Agent Reliability and Evaluation; Structured Reasoning; Multi-Agent Systems.

PUBLICATIONS

Jinghong Tang, **Zhijing Wu**, Yikun Liu, Wei Ju, and Jiyao Wang. “Hyperbolic Self-Supervised Pretraining for Hierarchical EEG Representation Learning in Generalizable Parkinson’s Disease Detection.” *2026 IEEE International Conference on Bioinformatics and Biomedicine (IEEE BIBM 2026)*. **Regular Paper, Accepted.**

SELECTED RESEARCH PROJECTS

Within-Step Corruption Timing for Computer-Use Agents | *Independent Extension of AgentHijack* 2026

- Extended AgentHijack to compare three within-step corruption timings: pre-observation, post-observation/pre-execution, and post-execution.
- Implemented controlled desktop-reveal perturbations, single-injection guards, trajectory logging, clean-task screening, and automated analysis in OSWorld/Docker.
- Across **3 Chrome tasks and 36 primary runs**, post-observation/pre-execution corruption increased mean episode length relative to pre-observation on **all 3/3 tasks (+4.00, +1.75, +1.00 steps)**; one task also exhibited lower success under stale timing.

Language Modeling from Scratch | *Stanford CS336, Independent Study* 2026

- Implemented BPE tokenization, Transformer components, optimization, training utilities, and end-to-end language-model training in PyTorch.
- Studied systems, scaling, data, and post-training, including efficient attention and distributed-training concepts.
- Studied SFT and reinforcement-learning-based post-training, including GRPO/GSPO-style optimization, with emphasis on tool-using agents.

Graph Machine Learning | *Independent Study* 2026

- Implemented GCN, GraphSAGE, and GAT in PyTorch Geometric and studied message passing, inductive learning, pooling, and graph-level evaluation.
- Explored graph representations as structured state for reasoning, memory, exploration, and multi-agent interaction.

AWARDS & HONORS

Meritorious Winner (M Award), Mathematical Contest in Modeling (MCM), 2026.

Third Prize, Sichuan Provincial Division, Lanqiao Cup, 2026.

TECHNICAL SKILLS

Programming: Python, C/C++

Machine Learning: PyTorch, PyTorch Geometric, Transformers, Graph Neural Networks

LLM / Systems: SFT, GRPO/GSPO, Linux, Git, Docker, Conda, vLLM
